

StorageCraft ShadowProtect®

IT EDITION & IT EDITION PRO

Unlimited Protection, Recovery and Migration
for Windows Systems without Adding Software

Introduction

Managing ever-changing business systems while maintaining 24/7 availability can be a challenge. Given the responsibility for tasks such as rolling out new applications, performing software upgrades, addressing imminent hardware failures, provisioning new workstations, virtualizing physical servers, and preparing for impending natural disasters, IT professionals need to be prepared for anything.

The Need

A flexible tool that allows you to quickly protect, recover, and migrate Windows systems, without adding new risks or headaches to system administration, is a must-have for any IT toolkit. For managed service providers (MSPs) the need for protection and flexibility is even more crucial because they have less control at client sites and may be working across clients with a variety of machines, both physical and virtual, from several different manufacturers.

The Solution

StorageCraft® ShadowProtect® IT Edition is a standalone tool that makes IT tasks easier. It's an essential addition to every IT technician's toolkit. With it you can reliably back up, recover, or migrate an *unlimited* number of *any* Windows servers, desktops or laptops during your subscription period—without installing any software or rebooting the system. It's preloaded on a convenient USB so you can easily carry it with you and always have it available whenever you need it.

The ShadowProtect IT Edition PRO version gives you even more by combining all the features and benefits of ShadowProtect IT Edition with StorageCraft Granular Recovery for Exchange. You gain the ability to search and recover an *unlimited* number of email messages and mailboxes for *every* Exchange server you support.

Examples of how you can use this flexible tool:

- Do a quick (hot) backup before starting any new project or system change
- Create a backup image of a system's original factory settings

- Upgrade to a new version of Windows operating system
- Migrate to new hardware or virtual environment
- Perform bare metal recovery in minutes
- Conduct maintenance or troubleshooting with powerful disk-based diagnostic utilities
- Support e-discovery efforts and computer forensics investigations
- Retrieve accidentally deleted email messages and other data (*IT Edition PRO only*)

Features and Benefits

Feature	Benefit
Unlimited, Unrestricted Usage	Back up, recover, and migrate an unlimited number of Windows systems (one at a time) during your subscription period.
Image-Based Backups	Quickly and efficiently captures your entire system including the operating system (OS), applications, settings, services, and your data. Application-awareness ensures transactionally-consistent backups of Exchange, SQL, and Sharepoint.
Full System Recovery	Recover complete systems in minutes.
File and Folder Recovery	Recover individual files and folders in seconds, without needing to restore the entire system.
StorageCraft Recovery Environment	Recover to the same physical or virtual environment with this powerful yet easy-to-use pre-OS bootable environment.
StorageCraft Hardware Independent Restore™ technology	Migrate backup images to new systems (physical or virtual). Recover to dissimilar hardware or a different hypervisor environment.
Bare Metal Restore	Perform a bare metal recovery of Windows servers, desktops, and laptops in minutes.
Unlimited Granular Recovery for Exchange Servers	Recover unlimited email messages and mailboxes from your Exchange database (.EDB) files. (<i>IT Edition PRO version only</i>)
Migration	Ideal for P2V, V2V, V2P, and P2P migrations.
Disk Copy	Copy an entire disk from one disk to another.
OS Support	Supports the same broad range of Windows operating systems that ShadowProtect licenses support.
Broad Hypervisor Support	Supports guests running on a wide range of hypervisor platforms including VMware ESX/ESXi, Microsoft Hyper-V, Citrix XenServer, Linux KVM, and more.
Licensing Options	Choose from a two-week, one-month, three-month, or annual subscription. Each license may be used by only one designated technician.
